## 01 PROFILE

Experienced Web Developer adept in all stages of advanced web development. Always ready for new challenges and believes that any goal can be achieved through hard work, good strategies and team collaboration. Passionate about simplifying and solving difficult problems. Bringing forth expertise in UX design, front-end and back-end development, testing and deployment of web systems. Proficient in an assortment of technologies, including JavaScript, React, Golang, SASS, Python. Able to effectively self-manage during independent projects, as well as collaborate in a team setting. Has established working and productivity habits for producing great results for tight deadlines.

## 02 EMPLOYMENT HISTORY

Mar 2021 — Present

### Front-end Web Developer at Keystone Solutions

Built and managed an ecosystem of front-end web applications consuming REST APIs from one's own or outsourced mockups. Collaborated with back-end team, stakeholders and testers to make design choices, identify and find the most optimal solutions for issues related to user experience, REST services, authentication and connection between the applications.

Systems built for the company:

- Software application that enables law enforcement officers to create PDF templates and build documents from them which could be sent or received with options to review, sign and add more information to them.
- Software application that enables inmates to receive and sign documents sent by law officers. This application is run on a hardware machine located in state prisons.
- Admin panel for managing data for the mentioned above software systems.
- Software application for searching and finding law-specific number extensions for different states and counties (USA).
- A phonebook-like software interface for searching and finding phone numbers.

Feb 2022 — Jun 2022

Eindhoven

### Team Leader at Onzechain

Led a team of passionate developers to create an easy-to-use decentralized exchange for crypto coins. As a team leader, my main goals were to establish working processes that would ensure communication, productivity and sustained results. Working alongside stakeholders we managed to build a web application where people could connect their crypto wallets and

swap their coins as well as provide liquidity and earn passive income. The project involved a lot of research on existing blockchain technology as well as careful planning and development.

Sep 2021 — Feb 2022

Eindhoven

## Front-end developer & UX Designer at Eurocom

Built and managed a front-end interface for monitoring health and environmental data for residents at nursing homes. This application would be used by caregivers and it serves as an extension for another application developed by Eurocom. The system includes the following features:

- Overview of all patients and their status
- Specific patient view with visualizations of all their monitored data
- Alert system for emergency situations

## 03 EDUCATION

Sep 2020 — Present

Eindhoven

## Fontys University of Applied Sciences

Bachelor of Information and Communication Technology

The most valuable skills I have improved during my studies are teamwork, communication, presentation and teaching. Coming into the studies with already established web development skills proved to be crucial when explaining my peers' difficult programming concepts.

## 04 SKILLS

Programming

Programming Languages

Knowledgeable in User Interface/ User Experience

Visual Design Skills

Ability to Work Under Pressure

Teamwork

Strong Leadership Skills

Communication Skills

Effective Time Management

Decision Making

Adaptability

Fast Learner

Creativity

## 05 LANGUAGES

English

Bulgarian

## 06 HOBBIES

Arm Wrestling, Biking, Gymnastics, Swimming, Chess
